searching the website associated with the bookmark in response to an
indicator being selected.
 3. (Original) The method of claim 1, further comprising:
providing a result of searching the website associated with the bookmark
to allow the result to be displayed.
 4. (Original) The method of claim 3, further comprising:
displaying the website in response to the result being selected.
 - ✓ 5. (Cancelled)

6. (Original) The method of claim 1, further comprising:
 providing the search term and the identifier associated with the bookmark to a search engine;
 searching the database using the search term in response to the search engine receiving the search term; and
 searching the website associated with the bookmark using the search term in response to the search engine receiving the identifier.
7. (Original) The method of claim 1, further comprising:
 accessing a file that includes the bookmark; and
 creating the identifier in response to accessing the file.
8. (Currently Amended) A system comprising:
 a computing device for:
 storing a bookmark;
 receiving a search term and an identifier associated with ~~a~~ the bookmark;
 searching a database coupled to the computing device using the search term and the identifier; and
 searching a website associated with the bookmark using the search term and the identifier; and-
 providing an advertisement associated with the bookmark and the identifier to the user.
9. (Original) The system of claim 8, wherein the computing device is for:
 searching the website associated with the bookmark in response to an indicator being selected.

10. (Original) The system of claim 8, wherein the computing device is for:
providing a result of searching the website associated with the bookmark
to a user device.
11. (Original) The system of claim 10, wherein the computing device is for:
providing the result to the user device to allow the website to be displayed
in response to the result being selected.
- ✓ 12. (Cancelled).
- BI 13. (Original) The system of claim 8, wherein the computing device is for:
providing the search term and the identifier associated with the bookmark
to a search engine;
searching the database using the search term in response to the search
engine receiving the search term; and
searching the website associated with the bookmark using the search
term in response to the search engine receiving the identifier.
14. (Original) The system of claim 8, wherein the computing device is for:
causing a file on the user device that includes the bookmark to be
accessed; and
causing the identifier to be created in response to the file being accessed.
15. (Original) The system of claim 8, wherein the computing device is for:
causing a file on a remote device that includes the bookmark to be
accessed; and
causing the identifier to be created in response to the bookmark file being
accessed.

16. (Currently Amended) A computer program product comprising:
a computer program processable by a computer system for causing the computer system to:

store a bookmark;

receive a search term and an identifier associated with a the
bookmark;

search a database coupled to the computer system using the
search term and the identifier; and

search a website associated with the bookmark using the search
term and the identifier; and

provide an advertisement associated with the bookmark and the
identifier to the user; and

an apparatus from which the computer program is accessible by the computer system.

17. (Original) The computer program product of claim 16, the computer program processable by the computer system for causing the computer system to:

search the website associated with the bookmark in response to an indicator being selected.

18. (Original) The computer program product of claim 16, the computer program processable by the computer system for causing the computer system to:

provide a result of searching the website associated with the bookmark to a user device.

19. (Original) The computer program product of claim 18, the computer program processable by the computer system for causing the computer system to:

provide a result of searching the website associated with the bookmark to a user device.

✓ 20. (Cancelled).

21. (Currently Amended) A method for searching websites associated with bookmarks comprising:

storing a plurality of bookmarks;

receiving a search term and an identifier associated with one of the bookmarks ~~a bookmark~~;

accessing a file that includes the bookmark;

creating the identifier in response to accessing the file;

providing the search term and the identifier associated with the bookmark to a search engine;

searching a database using the search term and the associated identifier;

and
searching a website associated with the bookmark using the search term and the associated identifier; and

displaying an advertisement associated with the bookmark and the identifier in response to a result of the search.

22. (Currently Amended) A system for searching websites associated with bookmarks comprising:

a computing device for:

storing a plurality of bookmarks;

receiving a search term and an identifier associated with ~~a bookmark~~ one of the bookmarks;

causing a file on a remote device that includes the associated
bookmark to be accessed;

causing the identifier to be created in response to the associated
bookmark file being accessed;

providing the search term and the identifier associated with the
bookmark to a search engine;

searching a database coupled to the computing device using the
search term and the associated identifier; and

searching a website associated with the bookmark using the search
term and the associated identifier; and-

displaying an advertisement associated with the bookmark and the
identifier in response to a result of the search.
